Explanation of the Calendar Pages.

At the head of the respective pages for each month are given the ordinary tables of the Changes and Quadratures of the Moon. These Tables—together with the first three vertical columns of each page—it is presumed, require no explanation. The fourth and fifth columns shew the mean times of the Rising and Setting of the Sun. The quantities are only set down to the nearest minute, the uncertainty of the observed times of the rising or setting of heavenly bodies on land, caused by the varying amount of horizontal refraction, and the general liability to the intervention of terrestrial objects in such observations, renders a closer approximation unnecessary for ordinary practical purposes. In the sixth column, marked "souths," are given the times which should be shewn by a well-regulated clock or watch when the Sun is on the meridian. The seventh column contains the mean times of the Rising or Setting of the Moon. The quantities are only set down to the nearest minute, for the reasons mentioned above in respect to the Sun.

ECLIPSES.

In the year 1846 there will be only two Eclipses, both of the Sun.

I. An Annular Eclipse of the Sun, April 25th, partly visible at Montreal, as follows:—

Begins,.....1h. 1m.	} Mean time in the Evening.
Greatest Phase,..1h. 28m.	
Ends,.....1h. 54m.	

Duration of visibility fifty-three minutes. Magnitude of the Eclipse (Sun's diameter) 0.23 on the Southern Limb. The path of the Central and Annular Eclipse will first touch the Earth in Longitude $135^{\circ} 51'$ West, and Latitude $2^{\circ} 11'$ South, taking a north-easterly course will traverse Guatemala, the West Indian Islands, and the Atlantic Ocean, and reaching Africa will terminate near the southern part of Morocco.

II. An Annular Eclipse of the Sun, October 20th, invisible at Montreal. Conjunction in Right Ascension at fifty-seven minutes after two in the Morning. This Eclipse will be visible in Africa, Australia, the Indian and Great Southern Oceans.

Government surveys are performed astronomically and without reference to the magnetic meridian;—the variation of the needle being at the same time ascertained.

By the ancient ordinance of 1676 it is regulated that the lateral lines of all the Seigniories on the St. Lawrence shall run astronomically due North West and South East. And by another ordinance of 1722, all concessions on the Lake of Two Mountains and on the Grand or Ottawa River shall run "Sud quart de Sud Ouest" and "Nord quart de Nord Est," or S. $11\frac{1}{4}^{\circ}$ W. and N. $11\frac{1}{4}^{\circ}$ E.

EXPLANATORY REMARKS ON THE CURRENCY OF CANADA.

From Appendix to "The Provincial Laws of the Customs," &c.

BY J. W. DUNSCOMB, ESQ.,

Commissioner of Customs.

The values assigned to the several coins by the Currency Act are not arbitrary, but are proportioned (except in the case of British silver) to the quantity of pure gold or silver in each. The £ currency was and is equal to 4 dollars of account; and a note for \$100 either in Upper or Lower Canada, is now, as it has always been, payable

by £25 cy., in any coins equivalent by law to that sum. By the Currency Act the Provincial dollar of account is made equal in value to that of the United States; and the Eagle coined after 1834 and before 1841 and passing there for \$10, is therefore made to pass for £2 10s. cy.,—and the *Par* is £1 cy. = \$4 of account of the United States, the value of any sum being always that of the *least* valuable coins by which it can be legally paid. The weight of pure gold in an Eagle and in a Sovereign are such, that if the former be worth £2 10s. the latter will be worth £1 4s. 4d. cy. which is the value the act assigns to it and to the £ sterling, and agrees with the value (\$4 86⅔) assigned to it by law in the United States.—The *Par* of cy. and stg., is therefore £1 stg. = £1 4s. 4d. cy., or £100 stg. = £121 13s. 4d., (or £121⅔) currency. But 10 silver dollars of proper weight and fineness are worth *more* than an Eagle or \$10 of account,—so that the silver dollar is really worth *nearly* 5s. 1d. cy., for which sum it is directed to pass. In the same manner the values of certain other foreign coins are ascertained and assigned. But as subsequent coins of the same nations might vary in weight or fineness,—such coins are not to be a legal tender unless under a proclamation issued after assay. British silver forms the exception to the rule above stated; it is only worth, as silver, 10-11 of the nominal value for which it passes on the faith of the British Government. This nominal value is maintained by the Currency Act, and such coins *while lawfully current in Great Britain* pass for sums proportionate to their nominal value there, at the rate of £1 4s. 4d. cy. for £1 stg.; but for the reasons above stated, it is provided that they shall not be a legal tender for more than £2 10s. cy. in any one payment.—At the foregoing rates:—

1d. stg. is = 1,216666, &c. of 1d. cy. = 2,027777, &c. cts.
 1d. cur. is = 821917, &c. of 1d. stg. = 1,666666, &c. cts.
 1 cent = 493150, &c. of 1d. stg. = 6 of 1d. cy.

The coins current by the Act are:—

British gold coins at the rate of £1 4s. 4d. cy. to £1. stg. American Eagles coined before 1st July 1834, at £2 13s. 4d. cy.—Do. coined between 1st July, 1834, and

1st January, 1841, at £2 10s.—and at the same rates for half Eagles, &c.

The above are a legal tender *by tale* if within 2 grains of full weight, deducting $\frac{1}{2}$ d. cy. for each $\frac{1}{4}$ of a grain wanting.

British gold and American gold coined before 1834, at 94s. 10d. cy. per oz. troy,—

American gold coined between 1834 and 1841, at 93s. cy. per oz. troy,—

Coined before Apr 26 1842.	{	Gold coin of France, at 93s 1d. cy. per oz. troy.	
		Do. of Laplata & Columbia, at 89s. 5d.	"
		Do. of Portugal & Brazil, at 94s. 6d	"
		Sp. Mex. & Chilian Doubloons at 89s. 7d.	"

—if offered respectively in sums of not less than £50 cy., at one time.

British silver as above stated.

The dollars of Spain, United States, Peru, Chili, Central America, States of South America and of Mexico, coined before 1841, at 5s. 1d. cy., and half dollars at 2s. 6 $\frac{1}{2}$ d. cy. Quarters at 1s. 3d. Eighths at 7 $\frac{1}{2}$ d., and sixteenths at 3 $\frac{1}{2}$ d., if legal weight. The parts less than halves being a tender at the said rates *by tale* to the amount of £2 10s. in one payment, until they have lost one twenty-fifth of their weight, and not afterwards.

French 5 franc silver pieces, coined before 26th April 1842, at 4s. 8d. each.

Gold and silver coins of the same nations of later dates, may be made current by proclamation to be issued as aforesaid.

Copper coins of the United Kingdom, (or any to be coined by Her Majesty of not less than five-sixths the weight of such coin) at their nominal rates.

The least legal weight of a Sovereign is, 5 dwts. 2 $\frac{1}{2}$ grs.—of an Eagle coined before 1834, 11 dwts. 6 grs.—after 1834, 10 dwts. 18 grs.—of a Dollar, 17 dwts. 4 grs.—of a 5 franc piece 16 dwts.

The £ *sterling*, in any act or contract made after the passing of the Currency Act, [proclaimed 26th April, 1842] is to be understood as equivalent to £1 4s. 4d. cy., but in any act or contract made before that time, the word *sterling* is to be construed according to the intention of the Legislature of the parties.
